SUBJECT INDEX
VOLUME 52

Acquired immunodeficiency syndrome
  type D retrovirus
    experimental infection of rhesus monkeys, 683
Adeno-associated virus
  capsid proteins
    origin, 591
Adenovirus 12
  antipeptide antibodies to tumor antigens
    E. coli, 136
    mammalian cells, 136
  early region 1A
    tumor antigen identification, 136
  E. coli
    antipeptide antibodies to tumor antigens, 136
  mammalian cells
    antipeptide antibodies to tumor antigens, 136
  nononcogenic mutants
    transformed cell oncogenicity, 687
    viral protein oncogenicity, 687
Adenovirus 2
  cyt gene
    early region 1B 19K polypeptide, 793
    oncogene for transformation in early region 1B, 793
  cyt$^+$ locus
    allele of *lp*$^+$ locus, 336
  degradation of chromosomal DNA
    early region 1B 19K tumor antigen mutations, 410
  early region 1B
    cyt$^+$ locus, 336
    lp$^+$ locus, 336
  E3 transcription unit
    adenovirus 5 conservation, 307
    new gene, 307
  lp$^+$ locus
    allelic with *cyt*$^+$, 336
    tumor antigen, 19 kilodalton, 336
Adenovirus 5
  adenovirus 2 E3 transcription unit conservation, 307
  cyt gene
    early region 1B 19K polypeptide, 793
    oncogene for transformation in early region 1B, 793
  cyt phenotype, 664
  degradation of chromosomal DNA
    early region 1B 19K tumor antigen mutations, 410
  early region 1A proteins
    rapid turnover, 706
  early region 1b 22- and 55-kilodalton proteins
    mutation effects on transformation, 389
  early region 1B 21K protein gene deletion
    cyt phenotype, 664
    host cell DNA degradation, 664
  host cell DNA degradation, 664
Adenoviruses
  cyt mutants
    early region 1B 21K protein of adenovirus 5, 664
  degradation of chromosomal DNA, 410
  early region 1B 19K tumor antigen mutations
    degradation of chromosomal DNA, 410
  fowl adenovirus 1
    core characterization, 638
African swine fever virus
  susceptibility
    porcine leukocyte subsets, 37
Age-related resistance
  paralysis after murine leukemia virus infection, 734
Aleutian disease virus
  antibody specificity in infection, 745
Amantadine
  Sindbis virus infection of BHK-21 cells, 857
Ambisense RNA
  Pichinde arenavirus, 897
Ammonium chloride
  Sindbis virus infection of BHK-21 cells, 857
Amphotropic murine leukemia virus
  disease specificity sequence map, 448
  leukemogenicity sequence map, 448
Antibody-dependent cell-mediated cytotoxicity
  Dengue virus-infected cells, 223
  lysis of Dengue virus-infected cells, 223
Antibody induction
  foot-and-mouth disease virus
    presensitized mouse spleen cell cultures, 650
Antiviral state
  interferon in cells, 284
Aphidicolin
  vaccinia virus aphidicolin-resistant mutant, 474
aprt gene
  Chinese hamster ovary cells
    transduction by HSV-1, 606
Arenaviruses
  Pichinde
    ambisense S RNA, 897
Attenuation
  transcription regulation
    minute virus of mice, 266
Aujeszky's disease
  pseudorabies virus
    envelope protein characterization, 583
Autographa californica nuclear polyhedrosis virus
  RNA mapping method, 255
  transcription of overlapping RNA sets, 255
Avian carcinoma virus MH2
  3'-terminal region
    sequences shared with avian sarcoma viruses Y73 and SR-A, 703
Avian leukemia viruses
  gag protein p19
    fine structure analyses, 145
  lipid-lipid interactions of *gag* protein p19, 145
  lipid-protein interactions of *gag* protein p19, 145
Avian leukosis virus
  subgroup F
    oncogenesis mechanisms, 1
Avian sarcoma viruses
  gag protein p19
    fine-structure analyses, 145
  lipid-lipid interactions of *gag* protein p19, 145
  lipid-protein interactions of *gag* protein p19, 145
  SR-A
    shared sequences with avian carcinoma virus MH2, 703
  Y73
    shared sequences with avian carcinoma virus MH2, 703

Bacillus subtilis
  bacteriophage SP10
    DNA sequence protection, 47
  bacteriophage SPO2
    L gene sequence, 9
Bacteriophage lambda
  DNA packaging
    mutant dependent on *E. coli* integration host factor, 966
  integration host factor in *E. coli*
    DNA packaging mutant, 966
Bacteriophage SP10
  DNA
    sequence protection by the hypermodified oxopyrimidine, 47
Bacteriophage SPO2
  DNA polymerase gene *L* nucleotide sequence, 9
Bacteriophage T4
  dar
    allelic with *uvsW*, 1028
    genetic analysis, 1028
  dar, *uvsW*, and *uvsY*
    allelism between *dar* and *uvsW*, 1028
  denV gene
    mapping, 846
    nucleotide sequence, 846
  uvsW
    allelic with *uvsW*, 1028
    genetic analysis, 1028
Bacteriophage T4D
  gene products 26 and 51
    baseplate hub structural components, 344
Bacteriophage T7
  methyl methanesulfonate inactivated multiplicity reactivation, 1009
Bacteriophage ϕW-14
  α-putrescinylthymine synthesis defect DNA synthesis in *Pseudomonas acidovorans*, 1036
Bacteriophage ϕX174
  gene *E* ribosome-binding site mutation construction, 892
    properties, 892
  maximum genome size, 822
  mutants with maximum genome size, 822
Baseplate hub
  bacteriophage T4D gene products 26 and 51, 344
B-cell lymphomas
  CWD/Agl mice
    murine leukemia virus expression, 691
Binding to cells
  HSV-1 virosomes, 238

Bluetongue virus type 17
latent state in MDBK cells, 288
lytic state in MDBK cells, 288
persistent state in MDBK cells, 288
Bovine herpesvirus 1
neutralizing determinants, 403
polypeptides
neutralizing determinants defined by monoclonal antibodies, 403
Bovine leukemia virus
integrated genome
flanking cellular sequences, 988
Bovine papillomavirus
minute virus of mice chimera
minute virus of mice structural protein expression, 320
transformation, 320
shuttle vector system, 320
Bovine papillomavirus type 1
transforming functions
localization and analysis, 377
Bovine viral diarrhea virus
cell-free translation of RNA, 973

Capsid proteins
adeno-associated virus
origins, 591
Cats
endogenous feline retrovirus
RD-114 gene family characterization, 164
Cell-mediated cytotoxicity
enhancement by purified influenza virus glycoproteins, 839
Cellular protein p53
simian virus 40 T antigen
complex formation, 350
CELO virus
core
polypeptide composition, 638
structural organization, 638
c-*fps*
NCP98
cellular localization, 913
Chloroquine
Sindbis virus infection of BHK-21 cells, 857
Cholesterol
Semliki Forest virus membrane fusion, 281
Circular DNA
herpesvirus sylvilagus
spleen cells of infected cottontail rabbits, 711
Coumermycin A1
herpes simplex virus gene, 370
resistance transferred to *E. coli* by herpes simplex virus, 370
Coxsackievirus B3
variants
characterization in mouse strains, 598
myocarditic capabilities, 598
c-*rel*
nucleic acid sequence, 172
Cytomegalovirus
guinea pig
genome characterization, 436
human
late transcripts, 129
major viral protein map and expression, 129
human strain AD169
heterogeneous L-S junction structure, 541
HSV *a* sequence homology, 541
murine
genome termini fusion after infection, 24
pathogenesis in natural killer cell-depleted mice, 119
Cytoplasmic polyhedrosis virus
efficiency of replication, 1024
Lymantria dispar cell line infection
protein synthesis, 1024
Cytotoxic T cells
murine influenza virus immunity during hyperthermia, 928

Dansylcadaverine
Sindbis virus infection of BHK-21 cells, 857
Dengue virus
lysis of infected cells
antibody-dependent cell-mediated cytotoxicity, 223
natural cell-mediated cytotoxicity, 223
Diarrhea
infant rats
rotavirus-like agent, 94
rotavirus-like agent
infant rats, 94
DNA binding
HSV-1 major DNA-binding protein
nucleic acid interaction, 727
viral DNA polymerase stimulation, 727
DNA degradation
adenovirus 5 early region 1B mutant
cyt phenotype, 664
chromosomal
adenovirus mutants, 410
DNA packaging
phage λ
role of *E. coli* integration host factor, 966
bacteriophage ϕX174
maximum genome size, 822
DNA polymerase
HSV-1
stimulation by major DNA-binding protein, 727
DNA sequence protection
bacteriophage SP10, 47
Duck hepatitis B virus
cloned DNA
infection of Pekin ducks, 932
Pekin ducks
infection with cloned DNA, 932
Ducks
Pekin
hepatitis B virus infection, 932

Early region 1b
adenovirus 5
mutations affecting transformation, 389
Ecotropic proviral sequences
AKR mouse thymus
inhibition of amplification by SMX-1 virus, 624

Electron microscopy
Epstein-Barr virus
replication of circular genome in latently infected cells, 549
Endogenous feline retroviral sequences
RD-114 gene family
molecular genetic characterization, 164
Endonuclease
La Crosse virions
methylated, cap dependent, 215
Endoplasmic reticulum
poliovirus protein association, 777
Epidermodysplasia verruciformis
human papillomavirus
genome characterization, 1013
molecular cloning of genomes, 1013
nine new types, 1013
human papillomaviruses 19, 20, and 25
genome characterization, 1019
molecular cloning of genomes, 1019
Epstein-Barr virus
monoclonal autoantibodies in transformed lymphocytes
reaction with antigens in multiple organs, 722
nuclear antigen
cellular protein that cross-reacts, 833
nuclear antigen identification, 88
replication of circular genomes in latently infected Raji cells
electron microscopic evidence, 549
rheumatoid arthritis
nuclear antigen identification in patient sera, 88
transformed cell lines
nuclear antigen identification, 88
Erythroleukemogenicity
Moloney murine leukemia virus
3′ end fragment of Friend virus, 248
Escherichia coli
antipeptide antibodies to adenovirus 12 tumor antigens, 136
coumermycin A1 resistance conferred by herpes simplex virus, 370
integration host factor
phage λ DNA packaging, 966

Feline retrovirus
endogenous
RD-114 gene family characterization, 164
Fever
augmentation of cellular immune response, 928
Fine structure analysis
herpes simplex virus
glycoprotein D type-common and type-specific antigenic sites, 431
Foot-and-mouth disease virus
antibody induction
presensitized mouse spleen cell cultures, 650
Fowl adenovirus 1
core
polypeptide composition, 638
structural organization, 638
fps
cellular
location, 913
Fujinami sarcoma virus
proto-oncogene location, 913

Friend helper murine leukemia virus
3′ end fragment
erythroleukemogenicity conferred on Moloney murine leukemia virus, 248
Frog virus 3
immediate-early gene
nucleotide sequence, 905
Fujinami sarcoma virus
P140
cellular localization, 557
temperature-sensitive strain, 557
P140 homolog location, 913
proto-oncogene c-*fps*, 913
temperature sensitivity, 557
transforming protein
cellular localization, 557
temperature-sensitive strain, 557
Fusion to cell membranes
HSV-1 virosomes, 238

gag protein p19
avian sarcoma and leukemia viruses
fine structure analyses, 145
lipid-lipid interactions, 145
lipid-protein interactions, 145
Gene walking
frog virus 3 immediate-early gene
nucleotide sequence, 905
Genome characterization
guinea pig cytomegalovirus
molecular cloning and physical mapping, 436
Glycoprotein C
HSV-1 mutants
multiple phenotypes, 566
selection with monoclonal antibodies, 566
Glycosylation
post-translational
HSV-1 precursor protein, 630
Guinea pig cytomegalovirus
genome characterization, 436

Hantaan virus
hemorrhagic fever with renal syndrome virus antigenic differences, 231
Hemagglutinin
cell-mediated cytotoxicity enhancement, 839
influenza B virus antigenic variants
antigenic structure, 919
monoclonal antibodies, 919
nucleotide sequence analysis, 919
Hemorrhagic fever with renal syndrome virus, Hantaan virus antigenic differences, 231
Hepatitis A virus
neutralizing antigenic site localization
monoclonal antibodies, 465
neutralizing monoclonal antibodies
neutralizing site partial localization, 465
Hepatitis B virus
duck
infection of Pekin ducks with cloned DNA, 932
large surface proteins
pre-*s* sequence, 396
pre-*s* sequence, 396
Hepatitis virus
woodchuck
core antigen and antibody in woodchucks, 70
Herpes simplex virus
cloned DNA fragments
coumermycin A1 resistance induced in *E. coli*, 370
new functions, 370
coumermycin A1 resistance gene, 370
delayed-early promoter-regulatory region
recombinant gene expression, 522
regulation, 522
trans activation, 522
glycoprotein C
CNBr fragment loss from the carboxy terminus, 806
transmembrane anchor sequence, 806
glycoprotein D
antigenic sites fine structure analysis, 431
type-common antigenic sites, 431
type-specific antigenic sites, 431
immediate-early promoter-regulatory region
recombinant gene expression, 522
regulation, 522
trans activation, 522
type-common antigenic sites of glycoprotein D
fine structure analysis, 431
types 1 and 2 homology, 615
type-specific antigenic sites of glycoprotein D
fine structure analysis, 431
zosteriform spread
immune cell role in prevention of recurrent disease, 816
recrudescence model, 816
Herpes simplex virus type 1
aprt gene transduction, 606
Chinese hamster ovary cells
aprt gene transduction, 606
early gene expression
ICP4 temperature-sensitive mutants, 767
glycoprotein C gene
homology with HSV-2 glycoprotein F gene, 154
glycoprotein C-negative mutants
multiple phenotypes, 566
secretion of truncated glycoproteins, 566
selection with monoclonal antibodies, 566
glycoprotein C nonglycosylated precursor
post-translational glycosylation evidence, 630
glycosylation of precursor protein, 630
homology with type 2, 615
ICP4
temperature-sensitive mutants permissive for early gene expression, 767
immediate-early mRNA 1, 715
immediate-early promoter-regulatory region
linkage with HSV-2 delayed-early promoter-regulatory region, 522
infected cell proteins
characterization of ICP0, ICP4, and ICP27 with monoclonal antibodies, 108
latent
multiple strains within individual human hosts, 300
major DNA-binding protein
nucleic acid interaction, 727
viral DNA polymerase stimulation, 727
multiple strains within individual human hosts, 300
neutralization-resistant mutants, 566
α-proteins 0, 4, and 27
characterization with monoclonal antibodies, 108
ribonucleotide reductase
HSV-2 ribonucleotide reductase similarities, 981
tandemly reiterated DNA sequence in long terminal repeat region
immediate-early mRNA 1 proximity, 715
temperature-sensitive mutants
ICP4 expression, 767
trans activation, 522
virosomes containing glycoproteins
cell binding, 238
fusion evidence, 238
Herpes simplex virus type 2
*Bgl*II N fragment
mRNA characterization, 99
delayed-early promoter-regulatory region
linkage with HSV-1 immediate-early promoter-regulatory region, 522
glycoprotein F gene
homology with HSV-1 glycoprotein C gene, 154
sequence, 154
homology with type 1, 615
mRNA characterization
*Bgl*II N fragment, 99
ribonucleotide reductase
HSV-1 ribonucleotide reductase similarities, 981
trans activation, 522
Herpesviruses
HSV-1 glycoprotein C gene and HSV-2 glycoprotein F gene homology, 154
Herpesvirus saimiri
classification into three groups, 932
nonstructural proteins
monoclonal antibodies, 872
oncogenicity region, 932
oncogenicity region of the genome
mapping of RNAs transcribed, 532
polyadenylated RNAs, 532
structural proteins
monoclonal antibodies, 872
variation in a DNA region required for oncogenicity
classification into three groups, 932
Herpesvirus sylvilagus
circular DNA
spleen cells of infected cottontail rabbits, 711
glycosylation of structural proteins, 1005
phosphorylation of structural proteins, 1005
polypeptides induced in productively infected cells, 976

structural proteins
modification, 1005
High-pressure liquid chromatography
murine leukemia virus
protein separation, 492
Host protein synthesis
herpesvirus sylvilagus infection
polypeptides induced, 976
Host range mutant formation
minute virus of mice, 63
H-1 parvovirus
major capsid protein amino terminus map, 77
NCPV1 multiple forms, 82
noncapsid protein multiple forms, 82
VP2′ amino terminus map, 77
Human cytomegalovirus
AD169 strain
heterogeneous L-S junction structure, 541
HSV *a* sequence homology, 541
late transcripts, 129
major viral protein map and expression, 129
Human papillomavirus
epidermodysplasia verruciformis, 1013
nine new types associated with epidermodysplasia verruciformis
genome characterization, 1013
molecular cloning of genomes, 1013
types 19, 20, and 25
epidermodysplasia verruciformis, 1019
genome characterization, 1019
molecular cloning of the genomes, 1019
Human rotavirus
RNA synthesis
effect of *S*-adenosylmethionine, 188
S-adenosylmethionine effects on RNA synthesis, 188
Hyperthermia
murine influenza virus
immune cytotoxic T cell generation, 928

Immortalization
simian virus 40 mutant construction, 884
Immunodeficiency syndrome of macaque monkeys
rhesus monkey type D retrovirus infection, 683
IM virus
characterization, 739
neurological disease isolate, 739
SMON virus similarities, 739
Infected cell proteins
HSV-1
characterization of ICP0, ICP4, and ICP27 with monoclonal antibodies, 108
Influenza B virus
hemagglutinin
antigenic structure, 919
monoclonal antibodies to antigenic variants, 919
nucleotide sequence analysis of antigenic variants, 919
Influenza virus
glycoproteins
cell-mediated cytotoxicity enhancement, 839
hemagglutinin
cell-mediated cytotoxicity enhancement, 839
neuraminidase
cell-mediated cytotoxicity enhancement, 839
Integrated virus
bovine leukemia virus
flanking cellular sequences, 988
Interferon
anti-interferon antibodies
antiviral state induction, 284
microinjection into cells, 284
antiviral state
induction in cells after microinjection of anti-interferon antibodies, 284
Intracisternal A-particle genes
transcription
mouse Ltk$^-$ cells, 29
mouse myeloma cells, 29

La Crosse virions
endonuclease
methylated, cap dependent, 215
RNA polymerase
primer stimulated, 215
Large T antigen
simian virus 40
monoclonal antibodies, 483
Latent virus
bluetongue virus type 17 in MDBK cells, 288
L cells
mice
minute virus of mice host range mutant formation, 63
Lentiviruses
latent form
naturally resident in long-term ovine fibroblast cultures, 680
lytic
genetically distinct from persistent viruses, 672
isolates from sheep with progressive pneumonia, 672
persistent
genetically distinct from highly lytic viruses, 672
isolates from sheep with progressive pneumonia, 672
sheep with progressive pneumonia
lytic isolates, 672
persistent isolates, 672
Leukocytes
African swine fever virus susceptibility, 37
Ltk$^-$ cells
mouse
intracisternal A-particle gene transcription, 29
Lymantria dispar
cytoplasmic polyhedrosis virus-infected cell line, 1024
Lysosomotropic weak bases
Sindbis virus infection of BHK-21 cells, 857

Measles virus
F protein monoclonal antibodies
stress proteins cross-reaction, 995
stress proteins
F protein monoclonal antibodies
cross-reaction, 995
Membrane fusion
Semliki Forest virus
role of cholesterol, 281
MH2
3′-terminal region
sequences shared with avian sarcoma viruses Y73 and SR-A, 703
Mice
AKR
inhibition of ecotropic and recombinant proviral sequence amplification, 624
coxsackievirus B3 variants
myocarditis, 598
CWD/Agl
murine leukemia virus expression in B-cell lymphomas, 691
ecotropic neurotropic retrovirus
paralysis-inducing determinant map, 356
foot-and-mouth disease virus antibody induction, 650
Ltk$^-$ cells
intracisternal A-particle gene transcription, 29
minute virus of mice
host range mutant formation in L cells, 63
MMTV-related sequences in lymphocytes
induction by 12-o-O-x-tetradecanoyl phorbol-13-acetate, 1000
mouse mammary tumor virus
organization and expression in C3Hf/HeSed tissues, 328
murine cytomegalovirus pathogenesis, 119
myeloma cells
intracisternal A-particle gene transcription, 29
natural killer cell depleted
murine cytomegalovirus pathogenesis, 119
paralysis after murine leukemia virus infection
age-related resistance, 734
Theiler's murine encephalomyelitis viruses
acute central nervous system infections, 960
persistent central nervous system infections, 960
thymic lymphomas
type B retrovirus DNA integration, 784
Minute virus of mice
expression in mouse cell lines, bovine papillomavirus chimera
minute virus of mice structural protein expression, 320
transformation, 320
lymphotropic strain
host range mutant formation, 63
shuttle vector system, 320
structural proteins
expression in cells transformed by bovine papillomavirus-minute virus of mice chimera, 320
transcription
attenuation regulation, 266
Moloney murine leukemia virus

disease specificity sequence map, 448
erythroleukemogenicity conferred by Friend virus, 248
HPLC protein separation, 492
leukemogenicity sequence map, 448
new *gag* and *env* cleavage products, 492
Moloney murine sarcoma virus
v-*mos*
promotion by long terminal repeat of mouse mammary tumor virus, 420
Monkeypox virus
monoclonal antibodies to a polypeptide determinant, 290
Monoclonal antibodies
bovine herpesvirus 1
neutralizing determinants, 403
hepatitis A virus
neutralizing antigenic site localization, 465
herpesvirus saimiri
nonstructural proteins, 872
structural proteins, 872
HSV-1
glycoprotein C-negative mutant selection, 566
measles virus F protein
stress proteins cross-reaction, 995
Semliki Forest virus
antigenic determinants, 575
simian virus 40 large T antigen specific, 483
varicella-zoster late proteins
gp1, 953
gp3, 953
125K, 953
varicella-zoster virus glycoproteins, 55
Monoclonal autoantibodies
Epstein-Barr virus-transformed lymphocytes
reaction with antigens in multiple organs, 722
Mouse mammary tumor virus
expression of sequences in normal and neoplastic C3Hf/HeSed mouse tissues, 328
long terminal repeat
v-*mos* steroid-inducible expression, 420
Moloney murine sarcoma virus
v-*mos* promotion, 420
organization of sequences in normal and neoplastic C3Hf/HeSed mouse tissues, 328
related sequences in mouse lymphocytes
induction by 12-O-tetradecanoyl phorbol-13-acetate, 1000
12-O-tetradecanoyl phorbol-13-acetate
induction of related sequences in mouse lymphocytes, 1000
v-*mos*
promotion by long terminal repeat, 420
mRNA capping enzyme large subunit
vaccinia virus
gene identification, 206
Multicapsid nuclear polyhedrosis viruses
conservation of genome organization, 699
Multiplicity reactivation
bacteriophage T7, 1009
Murine cytomegalovirus
genome termini fusion after infection, 24
Murine influenza virus
hyperthermia
immune cytotoxic T cell generation in vitro, 928
immune cytotoxic T cells
hyperthermia, 928
Murine leukemia virus
CWD/Agl mice
expression in B-cell lymphomas, 691
env
leukemogenic potential, 945
env cleavage products, new, 492
gag cleavage products, new, 492
Gross A
leukemogenic potential, 945
HPLC
protein separation, 492
leukemogenicity
primary determinant, 945
Moloney
leukemogenicity and disease specificity sequences, 448
Mus dunni cell line
lack of homology, 695
permissive for growth of all four types of MuLV, 695
paralysis
role of immunity in age-related resistance, 734
paralysis-inducing determinant map, 356
protein separation
HPLC, 492
new *gag* and *env* cleavage products, 492
tandem direct repeats within the long terminal repeat
leukemogenicity primary determinant, 945
Mus dunni cell line
murine leukemia virus sequence lack, 695
permissive for murine leukemia virus growth
amphotropic, 695
ecotropic, 695
mink cell focus-forming virus, 695
xenotropic, 695
Myeloma cells
mouse
intracisternal A-particle gene transcription, 29
Myocarditis
coxsackievirus B3, 598
mice
coxsackievirus B3 variant induction, 598

Natural cell-mediated cytotoxicity
Dengue virus-infected cells, 223
lysis of Dengue virus-infected cells, 223
Natural killer cells
cytomegalovirus pathogenesis in mice, 119
Dengue virus-infected cells
lysis assay, 223
depletion in mice
cytomegalovirus pathogenesis, 119
murine cytomegalovirus pathogenesis, 119
Neuraminidase
cell-mediated cytotoxicity enhancement, 839
Neurological disease
IM virus
characterization, 739
SMON virus similarities, 739
SMON virus
IM virus similarities, 739
Neurovirulence
pseudorabies virus
genetic basis, 198
Neutralization epitopes
varicella-zoster virus glycoproteins, 293
Neutralizing determinants
bovine herpesvirus 1, 403
Nuclear antigen
Epstein-Barr virus-induced, 88
Nuclear polyhedrosis viruses
multicapsid
conservation of genome organization, 699
Nucleosomes
simian virus 40
replication pause site correlation, 1011

2′-5′-Oligoadenylate-dependent endoribonuclease
reovirus
nascent mRNA, 865
Oncogenes
v-*rel*
nucleic acid sequence, 172
Oncogenesis
mechanisms
avian leukosis virus subgroup F, 1
Oncogenicity
adenovirus 12 nononcogenic mutants, 687

Papillomaviruses
bovine type 1
transforming functions localization and analysis, 377
Parainfluenza virus 3
fusion glycoprotein antibodies, 828
genomic RNA, 761
glycoproteins
serum antibodies in children, 828
hemagglutinin-neuraminidase glycoprotein antibodies, 828
human
genomic RNA structural characterization, 761
virion protein structural characterization, 761
virion proteins, 761
Parvoviruses
Aleutian disease virus
antibody specificity in infection, 745
H-1
major capsid protein amino terminus map, 77
NCPV1 multiple forms, 82
noncapsid protein multiple forms, 82
VP2′ amino terminus map, 77
minute virus of mice
structural protein expression, 320

Parvovirus H-1
major capsid protein amino terminus map, 77
NCVP1 multiple forms, 82
noncapsid protein multiple forms, 82
VP2′ amino terminus map, 77
Pichinde arenavirus
ambisense S RNA, 897
S RNA
ambisense, 897
Poliovirus
coat protein VP2
new neutralization antigenic site, 719
proteins associated with the endoplasmic reticulum, 777
superinfection
Sendai virus protein synthesis, 298
Polyadenylation aberration
vesicular stomatitis virus
L protein alteration, 515
Polymorphonuclear leukocytes
respiratory syncytial virus-infected cells
adherence, 16
virus interactions in humans, 16
Polyomavirus
DNA
large T antigen-binding sites, 750
early gene promoter
foreign DNA insert, 1032
foreign DNA insert in the early gene promoter region, 1032
large T antigen
binding sites within polyomavirus DNA, 750
middle T antigen
major tyrosine phosphorylation site in transformation, 457
regulatory sequences
large T antigen-binding sites, 750
transformation
middle T antigen major tyrosine phosphorylation site, 457
Pre-*s* sequence
hepatitis B virus large surface proteins, 396
α-Proteins
HSV-1
characterization of α0, 4, and 27 with monoclonal antibodies, 108
Proto-oncogenes
c-*rel*
nucleic acid sequence, 172
Proviral integration
SMX-1 virus inhibition, 624
Pseudorabies virus
envelope protein characterization, 583
neurovirulence
genetic basis, 198
α-Putrescinylthymine
bacteriophage ϕW-14 synthesis defect
Pseudomonas acidovorans DNA synthesis in infected cells, 1036

Rabbits
herpesvirus sylvilagus infection
circular DNA in spleen cells, 711
Rats
diarrhea caused by a rotavirus-like agent, 94
infant
diarrhea caused by a rotavirus-like agent, 94
rotavirus-like agent, 94
Rauscher murine leukemia virus
HPLC protein separation, 492
new *gag* and *env* cleavage products, 492
Reovirus
2′-5′-oligoadenylate-dependent endoribonuclease
nascent mRNA cleavage, 865
Reovirus type 3
segment S4
major virion surface protein gene sequence, 984
surface protein gene sequence, 984
Replication
Epstein-Barr virus
latently infected Raji cells, 549
vesicular stomatitis virus
blockage by pppA2′p5′A, 183
Replication pause sites
simian virus 40
nucleosome location correlation, 1011
Respiratory syncytial virus
human
transcriptional mapping, 364
phosphoprotein gene
sequence analysis, 991
polymorphonuclear leukocyte adherence to infected cells, 16
Reticuloendotheliosis virus
strain T
v-*rel* and c-*rel* sequences, 172
Retroviral plus-strand DNA
specific initiation, 314
Retroviruses
central nervous system disease, 356
plus-strand DNA initiation specificity, 314
type B
DNA integration in virus-induced primary murine thymic lymphomas, 784
type D
rhesus monkey experimental infection, 683
wild mouse ecotropic neurotropic
paralysis-inducing determinant map, 356
Retrovirus subgroup F
oncogenesis mechanisms, 1
Rhesus monkeys
type D retrovirus
experimental infection, 683
Rheumatoid arthritis
sera from patients
Epstein-Barr virus-induced nuclear antigen identification, 88
Ribonucleoside diphosphate reductase
herpes simplex virus types 1 and 2 similarities, 981
vaccinia virus induced, 501, 507
Ribonucleotide reductase
activity distinguishable from host cell activity, 501
herpes simplex virus types 1 and 2 similarities, 981
vaccinia virus induced, 507
Ribosome-binding sites
bacteriophage ϕX174
gene *E* mutation, 892
RNA mapping method
Autographa californica nuclear polyhedrosis virus
transcription of overlapping RNA sets, 255
RNA polymerase
La Crosse virions
primer stimulated, 215
RNA synthesis
human rotavirus
S-adenosylmethionine effects, 188
RNA transcription
initiation sites in vivo
mapping, 277
relative use, 277
RNA translation
cell-free
bovine viral diarrhea virus, 973
Rotaviruses
human
S-adenosylmethionine effects on RNA synthesis, 188
Rotavirus-like agent
infectious diarrhea of rats, 94
Rous sarcoma virus
initiation of plus-strand DNA specificity, 314

Semliki Forest virus
antigenic determinants
monoclonal antibodies, 575
membrane fusion
role of cholesterol, 281
monoclonal antibodies
antigenic determinants, 575
Sendai virus
M gene and protein, 656
protein synthesis
poliovirus superinfection effects, 298
Sheep
lentivirus infection
ovine fibroblast cultures, 680
lentivirus isolates
lytic and persistent, 672
Shuttle vector system
bovine papillomavirus-minute virus of mice chimera, 320
Simian virus 40
cellular p53 complex
location and kinetics, 350
immortalization-positive, transformation-deficient mutants
construction, 884
large T antigen
monoclonal antibodies specific for the carboxy terminus, 483
nucleosomes
replication pause site correlation, 1011
replication pause sites
nucleosome location correlation, 1011
T antigen complex with cellular p53
location and kinetics, 350
T antigen mutant construction, 884
transformation-deficient, immortalization-positive mutants
construction, 884
Sindbis virus
BHK-21 infection
lysosomotropic weak base effects, 857
SMON virus
IM virus similarities, 739

SMX-1 virus
AKR mouse thymus
inhibition of ecotropic and recombinant proviral sequence amplification, 624
proviral integration inhibition, 624
Subacute myelo-optico-neuropathy virus
IM virus similarities, 739
Subgroup F retroviruses
avian leukosis virus
oncogenesis mechanisms, 1
Superinfection
poliovirus
effect on Sendai virus protein synthesis, 298

T-cell lymphoma
polyadenylated RNAs of herpesvirus saimiri, 532
Termini fusion
murine cytomegalovirus genome, 24
12-O-tetradecanoyl phorbol-13-acetate
MMTV-related sequence induction in mouse lymphocytes, 1000
Theiler's murine encephalomyelitis viruses
acute central nervous system infection
RNA and proteins, 960
persistent central nervous system infection
RNA and proteins, 960
Thymic lymphomas
mice
type B retrovirus DNA integration, 784
trans activation
herpesviruses, 522
Transcription
minute virus of mice
regulation by attenuation, 266
RNA
initiation site maps, 277
relative use of initiation sites, 277
Transcriptional mapping
human respiratory syncytial virus, 364
Transduction
Chinese hamster ovary cells
aprt transduced by HSV-1, 606
HSV-1
aprt gene of Chinese hamster ovary cells, 606
Transformation
adenovirus 5
mutations in the 22- and 55-kilodalton proteins of early region 1b, 389
adenovirus *cyt* gene, 793
Fujinami sarcoma virus
P140 localization, 557
temperature-sensitive strain, 557
HSV-2 *Bgl*II N fragment
transcription map, 99
Transforming functions
bovine papillomavirus type 1
localization and analysis, 377
Translation
cell-free
bovine viral diarrhea virus RNA, 973
Type B retrovirus
DNA integration in virus-induced primary murine thymic lymphomas, 784
Type D retrovirus
rhesus monkeys
experimental infection, 683
Tyrosine phosphorylation
polyomavirus middle T antigen transformation, 457

Vaccinia virus
aphidicolin-resistant mutant, 474
mRNA-capping enzyme large subunit gene identification, 206
ribonucleotide reductase
activity distinguishable from host cell activity, 501
induction in primate cells, 507
Varicella-zoster virus
glycoprotein analysis, 55
glycoproteins
neutralization epitopes, 293
gp1, 953
gp3, 953
125K protein, 953
late protein analysis
gp1, 953
gp3, 953
125K protein, 953
monoclonal antibodies to glycoproteins, 55
neutralization epitopes on glycoproteins, 293
Vesicular stomatitis virus
L protein alteration
polyadenylation aberration, 515
polyadenylation aberration
L protein alteration, 515
pppA2′p5′A
replication blockage, 183
replication
blockage by pppA2′p5′A, 183
Virosomes
HSV-1
cell binding, 238
fusion evidence, 238
Virus interactions
polymorphonuclear leukocytes, 16
v-*mos*
Moloney murine sarcoma virus
promotion by long terminal repeat of mouse mammary tumor virus, 420
v-*rel*
reticuloendotheliosis virus strain T
nucleic acid sequence, 172

Woodchuck hepatitis virus
core antigen and antibody in woodchucks, 70
Woodchucks
woodchuck hepatitis virus infection, 70

Zosteriform rash
immune cell role, 816
recrudescence model, 816
